PURPLE COMET! MATH MEET

Fun and Free Since 2003
Online Team Based Math Competition

Take part in a growing INTERNATIONAL mathematics competition for middle and high school students. Schools may form as many teams as they want.

WHEN: TUESDAY, APRIL 14, 2026 THROUGH
THURSDAY, April 23, 2026 (UTC)

You can now better prepare for this contest by purchasing Purple Comet! Math Meet: the first ten years or Purple Comet! Math Meet: the next ten years, both books written by Dr. Titu Andreescu and Dr. Jonathan Kane

PURPLE COMET! MATH MEET

How it Works:

- Each team is required to have an adult supervisor.
- Supervisors need to register at the contest website.
- After registration, supervisors can sign up as many teams as they want.
- Each team may have from one to six students.
- During the contest period, from Tuesday, April 14 through Thursday, April 23 2026 (UTC), the supervisor selects a time to start each team's clock.
- Once a team's clock is started, team members may begin working contest problems.
- Contest problems appear on the team's screen and supervisors can provide printed versions.

FREE

- Middle school teams have 60 minutes to work on 20 problems.
- High school teams have 90 minutes to work on 30 problems.
- Each problem has a solution that is a non-negative integer.
- Teams may submit solutions to problems until their clocks run out.
- After the end of the contest, names of the winning teams are posted on the contest website. Supervisors receive reports about the performance of each of their teams.
- Each student receives a certificate of participation or an award certificate.
- All contest times are in Greenwich Mean Time also known as UTC, Coordinated Universal Time.

Features of the Purple Comet! Math Meet:

The annual contest began in 2003.

- Last year, more than 10,000 students competed on over 4,600 teams from 80 countries. Teams may enter as a small school team, a large school team, a mixed school team, or a noncompetitive team. Winners are chosen for each category except the noncompetitive category.
- Any adult including parents, teachers or friends, may serve as a supervisor.

- Teachers often serve as team supervisors, sometimes signing up all of their students onto teams.
- Any registered team can practice by taking an old contest exam at the contest website or by purchasing the contest book.
- Teams can compare their results to thousands of students from around the world.
- The website allows supervisors to register teams, run practice contests, and see contest results. Certificates for all team members can also be downloaded.
